

Course Outline

4	4471011					
1. COURSE INFORM		- ·				
Session Offered	Winter 202					
Course Name		tection & Mainte	enance II			
Course Code	ENRTECH	ENRTECH 4PP3				
Date(s) and Time(s)	Mondays,	Mondays, 7.00 – 10.00 pm				
of						
lectures	Dower 9 F	D				
Program Name	Power & Energy Engineering Technology, Bachelor of Technology Program					
Calendar Description	Balanced faults, computer-based fault studies, symmetrical components and sequence networks, unbalanced short-circuit and open-circuit faults, power system individual device protection methods, digital fault detection systems.					
Instructor(s)	Dr. Nilkam	Office Hours			nn@mcmaster.ca : : Appointment or Online	
2. COURSE SPECIF						
Course Description						
Course Description	Code		Туре		Hours per term	
Instruction Type	С	Classroom inst			39	
	L	Laboratory, wo		vork	4	
	T	Tutorial				
	DE	Distance education				
	Total Hours 43					
Resources	19	SBN		tle & Edition	Author & Publisher	
Resources	9780470057131 9781439888117		Computer Relaying for Power Systems, 2 nd Edition, 2009		Arun G. Phadke & James S. Thorp John Wiley &Sons	
			Protective Relaying, Principles and Applications, 4 th Edition		J. Lewis Blackburn, Thomas J. Domin CRC Press	
	Other	Supplies So		So	urce	
	PSSE C	PSSE Operation and Application Guides		Siemens website		
Prerequisite(s)	ENRTEC	H 4PM3 and regi	stration in Pow	er and Energy	Engineering Technology	
Corequisite(s)						
Antirequisite(s)						
Course Specific Policies	·					
		or deferred final exams (i.e., format may be written or oral).				

Departmental Policies	Please note that announcements concerning any type of graded min any format (e.g., announcements made only in class). Students a for completing the graded material regardless of whether they announcement or not. Students must maintain a GPA of 3.5/12 to continue in the program In order to achieve the required learning objectives, on average, B. students can expect to do at least 3 hours of "out-of-class" work for scheduled hour in class. "Out-of-class" work includes reading, resear assignments and preparation for tests and examinations. Where group work is indicated in the course outline, such collaborar mandatory. The use of cell phones, iPods, laptops and other personal electronic prohibited from the classroom during class time, unless the instructed explicit exception. Announcements made in class or placed on Avenue are considered.	Tech. every arch, tive work is c devices are or makes an		
	communicated to all students including those individuals that are not in class. Instructor has the right to submit work to software to identify plagiarism.			
3. SUBTOPIC(S)				
Week 1	Introduction to Power System Faults • Power System Faults - Classification, Causes, Effects • Analysis of a Balanced 3ph Fault • AC Component and DC Component • Asymmetrical Factors and ANSI Standard • Calculation of 3ph Fault Current and MVA level	Ch. 2 & 4 Book 2		
Week 2	 Unsymmetrical Faults, Matrix Method for Fault Analysis Review of Symmetrical Components LG, LL, LLG, Open Phase Fault Power System Y Matrix and Z Matrix Use of Z Matrix Method for Fault Analysis 	Ch. 2 & 4 Book 2		
Week 3	Calculation of Instant Fault Current Using PSSE Software	PSSE Manual		
	Ontario Transmission Code on Maximum Fault Currents			
Week 4	 Simulation of Faults Using PSSE and its Impact on Generators Basics of Synchronous Generator Operation Impact on Generators due to External Faults Role of Automatic Excitation and Governor Control Different Data Files needed to Simulate PSSE Transients Simulation of 3ph Fault Simulation of LG Fault 	PSSE Manual		
Week 5	 Generator Protection Differential Protection Stator Phase to Ground Fault Protection Methods Stator Same Phase Turn to Turn Fault Protection Methods Field Winding to Ground Fault Protection Methods Loss of Field Excitation Protection Methods Out-of-Step Protection Methods Reverse Power or Motoring Protection Methods Phase Unbalance Protection Methods Over/Under-Frequency, Over/Under-Excitation Protection 	Ch. 8 Book 2		

Week 6	 Motor Protection Basics of Synchronous Motor and Induction Motor Locked Rotor Protection Methods Thermal Detectors and Thermal Protection Methods Phase Failure Protection Methods Phase Reversal Protection Methods Overcurrent Protection Methods Other Protections Used in Motors 	Ch. 11 Book 2		
Week 7	Mid-Term Recess			
Week 8	Mid-Term Exam			
Week 9	Bus Bar Protection	Ch. 9 & 10 Book 2		
Week 10	Solid State or Electronic Relays			
Week 11	Digital or Numerical Relays			
Week 12	Fundamentals of Special Protection Schemes			
Week 13 All exan	Classes end : April 10, 2024 Final examination period: April 12, 2024 to April 25, 2024 minations MUST be written during the scheduled examination period.			
List of Experiments				
Lab 1	Feeder Protection	,		
Lab 2	Motor Protection			
Lab 3	Transformer Protection			

Note that this structure represents a plan and is subject to adjustment term by term.

The instructor and the University reserve the right to modify elements of the course during the term. The University may change the dates and deadlines for any or all courses in extreme circumstances. If either type of modification becomes necessary, reasonable notice and communication with the students will be given with explanation and the opportunity to comment on changes.

4. ASSESSMENT OF LEARNING *including dates*	Weight	
Assignments	15%	
Labs	15%	
Midterm Exam	30%	
Final Examination (tests cumulative knowledge)	40%	
TOTAL	100%	
Percentage grades will be converted to letter grades and grade points per the University calendar.		

5. LEARNING OUTCOMES

- 1. Perform advanced fault analysis using symmetrical components and Z-matrix method
- 2. Be able to apply protective relays for motor, generator, bus bar, and shunt capacitor bank protection
- 3. Be able to design power system special protection schemes
- 4. Identify the working principle of digital relays
- 6. Identify the key roles of modern power system control centers in wide area system protection
- 7. Use PSSE to simulate generator issues that need protection

6. POLICIES

Anti-Discrimination

The Faculty of Engineering is concerned with ensuring an environment that is free of all discrimination. If there is a problem, individuals are reminded that they should contact the Department Chair, the Sexual Harassment Officer or the Human Rights Consultant, as soon as possible.

http://www.mcmaster.ca/policy/General/HR/Discrimination_Harassment_Sexual_Harassment-Prevention&Response.pdf

Academic Integrity

You are required to exhibit honesty and use ethical behavior in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity.

Academic dishonesty is to knowingly act of fail to act in a way that results or could result in unearned academic credit or advantage. This behavior can result in serious consequences e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university.

It is your responsibility to understand what constitutes academic dishonesty. For information on the various kinds of academic dishonesty please refer to the Academic Integrity Policy, located at: http://www.mcmaster.ca/policy/Students-AcademicStudies/AcademicIntegrity.pdf.

The following illustrates only three forms of academic dishonesty:

- 1. Plagiarism. E.g., the submission of work that is not own or for which other credit has been obtained
- 2. Improper collaboration in group work
- 3. Copying or using unauthorized aids in tests and examinations.

Requests for Relief for Missed Academic Term Work (Assignments, Mid-Terms, etc.)

The McMaster Student Absence Form is an on-line self-reporting tool for Undergraduate Students to report absences for:

- 1) Relief for missed academic work worth less than 25% of the final grade resulting from medical or personal situations lasting up to three calendar days:
 - Students may submit a maximum of one academic work missed request per term. It is the responsibility of the student to follow up with instructors immediately (within the 3-day period that is specified in the MSAF) regarding the nature of the accommodation. All work due in that time period however can be covered by one MSAF.
 - MSAF cannot be used to meet religious obligation or celebration of an important religious holiday, for that has already been completed or attempted or to apply for relief for any final examination or its equivalent.
- 2) For medical or personal situations lasting more than three calendar days, and/or for missed academic work worth 25% or more of the final grade, and/or for any request for relief in a term where the MSAF has not been used previously in that term:

Students must visit their Associate Dean's Office (Faculty Office) and provide supporting documentation.

E-Learning Policy

Consistent with the Bachelor of Technology's policy to utilize e-learning as a complement to traditional classroom instruction, students are expected to obtain appropriate passwords and accounts to access Avenue To Learn for this course. Materials will be posted by class for student download. It is expected that students will avail themselves of these materials prior to class. Students should be aware that, when they access the electronic components of this course, private information such as first and last names, usernames for the McMaster e-mail account, and program affiliation may become apparent to all other students in the course. The available information is dependent on the technology used. Continuation of this course will be deemed consent to this disclosure. If you have any questions or concerns about this disclosure, please discuss this with the course instructor. Avenue can be accessed via http://avenue.mcmaster.ca.

Communications

It is the student's responsibility to:

- Maintain current contact information with the University, including address, phone numbers, and emergency contact information.
- Use the University provided e-mail address or maintain a valid forwarding e-mail address.
- Regularly check the official University communications channels. Official University
 communications are considered received if sent by postal mail, by fax, or by e-mail to the student's
 designated primary e-mail account via their @mcmaster.ca alias.
- Accept that forwarded e-mails may be lost and that e-mail is considered received if sent via the student's @mcmaster.ca alias.
- Check the McMaster/Avenue email and course websites on a regular basis during the term.

Turnitin (Optional)

This course will be using a web-based service (Turnitin.com) to reveal plagiarism. Students submit their assignment/work electronically to Turnitin.com where it is checked against the internet, published works and Turnitin's database for similar or identical work. If Turnitin finds similar or identical work that has not been properly cited, a report is sent to the instructor showing the student's work and the original source. The instructor reviews what Turnitin has found and then determines if he/she thinks there is a problem with the work. Students who do not wish to submit their work to Turnitin.com must still submit a copy to the instructor. No penalty will be assigned to a student who does not submit work to Turnitin.com. All submitted work is subject to normal verification that standards of academic integrity have been upheld

(e.g., on-line search, etc.). To see the Turnitin.com Policy, please go to http://www.mcmaster.ca/academicintegrity/turnitin/students/

Protection of Privacy Act (FIPPA)

The Freedom of Information and Protection of Privacy Act (FIPPA) applies to universities. Instructors should take care to protect student names, student numbers, grades and all other personal information at all times. For example, the submission and return of assignments and posting of grades must be done in a manner that ensures confidentiality. http://www.mcmaster.ca/univsec/fippa/fippa.cfm

Academic Accommodation of Students with Disabilities Policy

Students who require academic accommodation must contact Student Accessibility Services (SAS) to make arrangements with a Program Coordinator. Academic accommodation must be arranged for each term of study. Student Accessibility Services can be contacted by phone 905-525-9140 ext. 28652 or e-mail sas@mcmaster.ca. For further information consult McMaster's policy for Academic Accommodation of Students with Disabilities http://www.mcmaster.ca/policy/Students AcademicStudies/AcademicStudies.pdf

Students must forward a copy of the SAS accommodation to the instructor of each course and to the Program Administrator of the B.Tech. Program immediately upon receipt. If a student with a disability chooses NOT to take advantage of a SAS accommodation and chooses to sit for a regular exam, a petition for relief may not be filed after the examination is complete. http://sas.mcmaster.ca

Student Code of Conduct

The Student Code of Conduct (SCC) exists to promote the safety and security of all the students in the McMaster community and to encourage respect for others, their property and the laws of the land. McMaster University is a community which values mutual respect for the rights, responsibilities, dignity and well-being of others. The purpose of the Student Code of Conduct is to outline accepted standards ofbehavior that are harmonious with the goals and the well-being of the University community, and to define the procedures to be followed when students fail to meet the accepted standards of behavior. All students have the responsibility to familiarize themselves with the University regulations and the conduct expected of them while studying at McMaster University.
